

PRESS RELEASE

Casablanca, Tuesday June 11, 2019

OCP SOLUTIONS is supporting the first edition of North African Machine Learning Summer School (NASSMA), which will take place in Mohammed VI Polytechnic University (UM6P), Ben Guerir, Morocco from the 24th to the 29th of June 2019. The focus of the first edition is on the foundations of Deep Neural Networks.

NASSMA will provide a unique opportunity to learn from experts in the field, engage with other researchers, and understand the major challenges in this hot area of research. Through a combination of lectures and practical labs, the summer school will deliver contents to get started and apply machine learning to your research problems.

About NASSMA

NASSMA is the North African Summer School in Machine Learning. It is a one-week summer school, which focuses on machine learning and artificial intelligence. Through a combination of lectures and practical labs, the summer school will deliver contents to get started in this field and apply machine learning to your research problems. The summer school is specifically aimed at graduate students, although it is open to everyone. The first edition of the summer school will focus on Deep Neural Networks. The courses will be taught in English.
